Metric gages now available in every .0025mm size, from 0.1000mm to 25.7000mm in 25-gage sets, or individually.

METRIC X GAGE-SETS

Tolerance: +.001mm Minus Nothing

SPECIAL GAGE-SETS – Over 200 "Metric X" standard sets are listed on this page. However, a potential for many thousands of additional sets exists within the Deltronic gage stock. Special nominal-size sets can be made up to suit your needs, within the range of .1000mm up to 25.7000mm, at the same standard set prices. Special sets are available in regular increments only, steps of .0100mm, .0050mm and .0025mm.

STANDARD GAGE-SET packaging consists of a Dust/Rust protection case that contains a labeling center strip to mark the location of the nominal gage and the exact slot location of each gage by increment. Each size-marked gage is easily located and replaced to maintain the order of the set. The clear plastic lid of each set is labeled to identity set type, nominal gage size, increments and limits of size range coverage. The double label makes this information visible from both the front and top of the case.

HTM24 (.0050MM STEP) GAGE-SETS

HTM24 "Metric X" Gage-Sets consist of a nominal size gage plus 23 gages in SIZES RANGING UPWARD only from the nominal in .0050mm steps. Nominal determines set coverage.
